

Update on Park Entry Sign Design

The City of Novi solicited three proposals for professional services for the design of City and Park entryway signs and the preparation of bid specifications. Based upon review of materials submitted, discussion with current clients of vendors, and an interview process, the contract was awarded to Sign Graphics. Sign Graphics is currently working with Providence Hospital, ITC Transmissions Holdings, Corp., and Ryder Systems, Inc.

The proposed entryway sign design will be presented to City Council on April 7, 2008. Following design approval by City Council, a constructive and installable bid package will be placed on BidNet, with the first three signs being erected at Twelve Mile and Haggerty Roads, Eight Mile and Haggerty Roads, and Eight Mile and Napier Roads.

The initial park entryway signs will be installed at the ITC Community Sports Park (2), Tom Holzer Field at Power Park and the Telcom Playstructure at Power Park. These signs will be funded from the Park Naming Rights fund, in accordance with the Naming Rights Agreement.

Future Park entry signs will be placed at the following locations as funding becomes available:

- Lakeshore Park
- Brookfarm Park
- Rotary Park
- Power Park
- Wildlife Woods Park
