

CITY of NOVI CITY COUNCIL

Agenda Item H
March 14, 2016

SUBJECT: Approval to award a unit price contract for Catch Basin Cleaning Services to United Resources LLC., the low bidder, for a one-year term with two one-year renewal options at an estimated annual cost of \$36,000

SUBMITTING DEPARTMENT: Department of Public Services –Field Operations Division *(MLO)* *R24*

CITY MANAGER APPROVAL: *(Signature)*

EXPENDITURE REQUIRED	\$36,000 (Estimated)
AMOUNT BUDGETED	\$151,997.00 (210-211.00-872.000 – Storm Sewer Maintenance)
APPROPRIATION REQUIRED	N/A
LINE ITEM NUMBER	210-211.00-872.000 (Storm Sewer Maintenance)

BACKGROUND INFORMATION:

The City of Novi is responsible for the inspection, cleaning, and rehabilitation of approximately 6,500 storm water collection and treatment structures throughout the community along the roadways. These structures collect rainwater, snow melt and excess irrigation water that drains overland and from paved surfaces. Each serve as the first step in managing the local storm water collection and discharge control operation. The Department of Public Services is responsible for cleaning approximately 700 of these structures annually, as part of a 5-year cyclical cleaning program.

The bottom of many of these structures is designed to filter out sediments, woody debris and refuse. If these structures are not cleaned on a regular basis, they have the potential to release unwanted sediment downstream into streams and lakes; or they could possibly become clogged and cause localized flooding.

Five bids were received and opened on March 3, 2016 following a public bid solicitation period. The low bidder is United Resources, LLC. United Resources provided unit pricing on catch basin cleaning, storm sewer jetting and closed circuit television (CCTV) inspection. Pricing was also submitted for after-hours/emergency work.

United Resources is recommended as being in the best interest of the City for being responsive (i.e., United Resources has complied with all requirements of the bidding instructions), and for submitting the lowest price based on extended unit pricing.

United Resources is has previously completed catch basin cleaning services successfully for the City of Novi, and also holds the contract for snow and ice removal from non-motorized routes in the winter months.

RECOMMENDED ACTION: Approval to award a unit price contract for Catch Basin Cleaning Services to United Resources LLC., the low bidder, for a one-year term with two one-year renewal options at an estimated annual cost of \$36,000

CITY OF NOVI
CATCH BASIN CLEANING SERVICES
SPECIFICATIONS

SCOPE OF WORK

The City of Novi maintains approximately 3,500 storm sewer structures throughout the community. Each season the Department of Public Services is responsible for cleaning an estimated 700 assets along major and neighborhood roadways between April and October. The City also responds to limited concerns in the evenings, weekends, or holidays to abate flooding concerns or investigate potentially damaged storm sewer line breaks through mechanical or televised inspection.

The Contractor shall perform the following services in accordance with the requirements as defined and noted herein:

1. The successful bidder shall provide all necessary material, labor, and equipment associated with cleaning catch basins; including hauling and disposing waste off site, and upon request, jet clean any outlet in a catch basin that is covered by debris, up to a maximum of fifty (50) feet.
2. The purpose of this contract is to clean storm sewer catch basins and jet storm sewers in compliance with the contract specifications, general conditions, and general specifications. All work performed under this contract shall be performed in compliance with the City of Novi's NPDES phase 2 Storm Water Permit, as well as applicable City, State and Federal laws, rules, regulations and ordinances.
3. All work performed under this contract shall also comply with the regulations promulgated by the Michigan Department of Environmental Quality (MDEQ), Water Bureau (WB), and Waste and Hazardous Materials Division (WHMD).
4. The contractor shall be registered and permitted as a uniform liquid industrial waste transporter under the provisions of Hazardous Materials Transportation Act (HMTA). The contractor/transporter must notify the Waste and Hazardous Materials Division (WHMD) concerning the work called for under this agreement and obtain a site identification number. A uniform hazardous waste manifest, or consolidated manifest, must accompany loads per MDEQ operational memo 121-3. The waste transporting portion of the vehicle and/or containers used to transport the waste must be kept closed except when adding or removing waste. The vehicle's exterior shall be kept free of the liquid waste and residue. Throughout the term of the agreement, the contractor shall maintain appropriate pollution liability insurance.

5. Once the project has begun, the contractor is expected to proceed without delay or disruption, except for work stoppage due to inclement weather.
6. All Vacators shall be ten yard, 150 GPM, or approved equivalent. All equipment shall be equipped with strobe lights, flashers, and other caution systems, in compliance with all City, State and Federal rules, regulations, ordinances, and standards. All machines supplied by the contractor shall be uniform in appearance, maintained in a reasonably neat and clean condition, and shall be cleaned before starting work (to prevent any hazardous materials collected from other locations from contaminating the spoils removed from Novi's catch basins). The City reserves the right to examine and approve contractor's catch basin cleaning and storm sewer jetting equipment prior to the award of contract. The Contractor may be given access to the DPS yard to dump select spoils. This will allow greater production by the cleaning equipment while transportation of the spoils to the disposal site is accomplished by other vehicles.
7. At all times during the performance of the contract, the contractor shall provide and maintain, in full operation, a sufficient crew of workers, safety signing, tools, materials and reliable equipment to perform the work as specified. The contractor shall be responsible for the conduct and discipline of all of his employees.
8. The contractor shall not subcontract this work without prior written approval of the City of Novi.
9. The contractor will conduct his work in such a manner to ensure that the work does not interfere with regular traffic flow, shall not create traffic congestion, or a traffic hazard. All work zones and work convoys shall conform to the requirement of the Michigan Manual for Uniform Traffic Control Devices.
10. The contractor shall be responsible for cleaning all assigned catch basins and storm sewers in the City of Novi in a professional manner. If the City's inspector determines that a catch basin does not warrant cleaning, it will be skipped over and no fee will be paid. So called "short" or "shallow" catch basins are frequently skipped. All schedules and work performance will be monitored and approved by the DPS Roadway Asset Manager, or their designee. Catch basin cleaning and storm sewer jetting shall not be scheduled when precipitation is forecast.
11. The contractor will mark with paint (small dot) on the top of each catch basin after it is thoroughly cleaned. The contractor shall complete and submit a daily work report indicating the date, location, and condition of the catch basins serviced.

12. The contractor will notify the DPS of any catch basins that are in need of repair.
13. The contractor will be responsible for leaving the work areas safe and clean, including all leaks and spills.
14. The DPS facility will not be available as a disposal location. Liquids from the catch basin cleaning operation shall be discharged into the City's sanitary sewer system at designated manholes approved by the DPS and the Oakland County Water Resources Commission (OCWRC), pursuant to part 121, Liquid Industrial Wastes (part 121) of the Natural Resources and Environmental Protection Act (NREPA). The City will obtain a permit from the Oakland County Water Resources Commission to discharge, and pay all sanitary sewer fees associated with the liquid discharge.
15. The remaining solids shall be transported to a licensed and permitted drying bed facility for final dewatering and disposal. All costs associated with this phase of the work shall be paid by the contractor and shall be incidental to the cost of cleaning the catch basins. The catch basin unit cost shall include collection, processing, transport of spoils, and final disposal. In other words, all steps to complete catch basin cleaning with the sole exception of the sanitary sewage fee for processing clear liquid from the Vactor. It may become necessary to collect samples of both liquid and solid spoils for testing by a licensed testing engineer for the purpose of waste characterization and/or to satisfy the requirements of the landfill, OCWRC and/or MDEQ. The cost of these tests shall be paid by the City of Novi.

INTENT: This addendum has been issued to modify and/or interpret the original specifications for the bid/RFP named above. Unless otherwise instructed, the information contained within this Addendum shall take precedence over anything contrary in the original specifications, and shall hereinafter be considered as part of the package.

RESPONSE: The Contractor shall verify receipt of this Addendum on the Bid/Fee Proposal Form.

CONTENTS: Included in this Addendum is one (1) page of written addenda description.

QUESTIONS:

1. After reading the specifications I noticed that you ask for a Jetter with 150 gpm. Will a Bid be accepted using an 80 gallon a minute Vac Jetter 2100?

Answer: Yes.

2. Please clarify what kind of services and equipment we will be expected to provide for the After Hours/Emergency Work. 1. Storm Sewer Jetting? 2.CCTV Inspection? 3. Easement Machine? 4. Pumping? 5. Disposal?

Answer: After Hours/Emergency work would be the same services & equipment described in the Scope of Work that would be performed during normal business hours, but done on after hours on an emergency basis.

3. The bid sheet has an item for After Hours Emergency Work. Is this for Cleaner Truck work only and not TV as well ? There is only one spot to put rate and those trucks will have different rates.

Answer: Please write the emergency hourly rate with the cleaner/jetting equipment in the table provided (and make a note that this pricing is for jetting). Then in the Comments section, or on an additional sheet, you can provide the hourly rate with the TV equipment only, and hourly rate with both types of equipment. If you anticipate other charges for emergency work, be sure to include them.
